

Everything for beauty: MEDISANA extends its beauty product portfolio

Neuss, 02-09-2016. A well-groomed appearance ensures a positive first impression. To help those wanting to always look well-groomed to carry out their beauty treatment conveniently at home, MEDISANA has expanded its beauty range with several new products.

The new MEDISANA **hair removal system Silhouette IPL 800** achieves permanent hair reduction thanks to its effective technology. It deactivates the hair roots deep under the skin and thus prevents the growth of new hair. After just four weeks of use, a hair reduction of up to 50 percent can be observed with the MEDISANA hair reduction system Silhouette IPL 800. The result: Smooth and pliable skin.

Cleaning the skin of the face is a particularly important care ritual. The new MEDISANA **face cleaning brush FB 880** provides an especially soft and thorough skin cleaning. It deep-cleanses the sensitive skin of the face of impurities and dead skin dander - for an impressive cleaning effect and a more radiant complexion. Equipped with three different attachments for different skin types, a convenient skin zone timer and light vibration, the face cleaning brush gently stimulates blood circulation of the face skin. This facilitates the absorption of applied care products to the best possible extent and the skin once again looks healthy and fresh.

The new MEDISANA **Callus Remover CR 860** softly and effectively removes excessive callused skin and sustainably smoothes the skin. Thanks to the two exchangeable grinding attachments and the two speed levels, it is possible to treat three bodily regions - the feet, the hands and the elbows- for a tangibly softer and more pliable skin.

In the product category body care, MEDISANA currently offers products in the areas of face care, vanity mirrors, hair removal, hand and foot care as well as cellulite massage. An overview

of all the products can be seen at www.medisana.de. Autumn will see the introduction of more superlative beauty innovations.
